Summary

- My broader research interests and expertise lie at the intersection of **biology**, **deep learning**, and **molecular simulation**, with the goal of translating my expertise into useful scientific discoveries.
- I am motivated to better understand how data, scale, and ML can help advance our understanding of these biomolecules. Accordingly:
 - I was one of the first people to bring discrete diffusion to protein sequence design (**Alamdari** et al., *BioRxiv* 2023)
 - I later took these same concepts to build generative and predictive frameworks applied to protease systems for early cancer detection (Alonso and **Alamdari** et al., *Nature Communications* 2026)
 - Then recently expanded this framework to understand the role of data composition and size, ultimately releasing the Dayhoff Atlas (Yang, **Alamdari** and Lee, et al., *Cell Systems* 2026)
- I thrive in collaborative environments where I need to work closely with a team to solve large and challenging problems.

Experience

Dec 2023 – Present	Senior Applied Scientist, Biomedical ML Group, <i>Microsoft Research</i>
Apr 2022 – Dec 2023	Data Scientist, Biomedical ML Group, <i>Microsoft Research</i>
Jan 2022 – Apr 2022	Postdoctoral Researcher, Pfaendtner Research Group, <i>University of Washington</i>

Education

2021	PhD Chemical Engineering, <i>University of Washington</i> • Thesis: Discovery of Biomolecular Structure-Function Mechanisms with Computational Frameworks at the Nanoscale (Advisor: Jim Pfaendtner) • Completed <i>Data Science Option</i> certification
2016	BS Chemical Engineering, <i>Arizona State University</i> • Graduated <i>Magna Cum Laude</i>

Select Invited Talks

- | | |
|-------------|---|
| 2026 | Sequence based approached to protein design. <i>Protein Talk Protein Evolution, Design and Informatics, Biochemical Society (Edinburgh, Scotland)</i> |
| 2025 | Sequence based approaches to protein design. <i>AI4Science Seminar, Chalmers University (Gothenburg, Sweden)</i> |
| 2025 | Protein design in sequence space. <i>39th Annual Symposium of The Protein Society (San Francisco, CA – delivered virtually)</i> |
| 2025 | Generative sequence-based approaches to protein design. <i>Schrödinger Biologics Symposium (Cambridge, MA)</i> |
| 2025 | EvoDiff: A General-Purpose Diffusion Framework for Programmable, Sequence-first Protein Design. <i>Applied ML Days, EPFL (Lausanne, Switzerland)</i> |
| 2024 | Discrete diffusion models for generative protein design. <i>Boston Protein Design and Modeling Club (BPDMC) (Cambridge, MA)</i> |
| 2024 | In-silico design of protease-cleavable peptide substrates, <i>Gordon Research Conference on Proteolytic Enzymes and Their Inhibitors (Lucca, Italy)</i> |
| 2024 | AI Driven Revolutions in Protein Engineering: Pioneering the Next Wave of Biotech Innovations, <i>SynBioBeta (San Jose, CA)</i> |
| 2024 | Discrete diffusion models for controllable protein generation. <i>Molecular ML Reading Group, Rosetta Commons (virtual)</i> |
| 2023 | Discrete diffusion models for controllable protein generation. <i>ML Ideas, Microsoft Research (Cambridge, MA)</i> |
| 2023 | An introduction to diffusion models. <i>Models, Inference & Algorithms (MIA) Initiative Seminar Series at the Broad Institute (Cambridge, MA)</i> |
| 2023 | Sequence-first generative approaches for protein design. <i>AstraZeneca Journal Club. (virtual)</i> |

- 2023** Protein sequence generation with evolutionary diffusion. *Google Research. (Cambridge, MA)*
- 2022** Exploration of the Peptoid Folding Landscape with Metadynamics. *University at Buffalo CBE Seminar. (Buffalo, NY)*
- 2021** A Thermodynamic Basis for Peptoid Assembly into a Helix by A Chiral Sidechain. *Broadbelt Group, Northwestern. (Evanston, IL)*
- 2021** Simulations of the Peptoid Folding Landscape with Metadynamics. *UW ChemE Seminar. (Seattle, WA)*
- 2021** Exploration of the Peptoid Folding Landscape with Metadynamics. *Molecular Foundry Lawrence Berkeley National Lab. (virtual)*
- 2021** Combining simulation and experiment to study protein structure at interfaces. *Biophysics Society Student Networking Event. (virtual)*
- 2021** Biomolecular Assembly at Interfaces. *ChE Future Faculty Seminar Series. (virtual)*

Select Awards

- 2022** VITAL Future Faculty, *University at Buffalo*
- 2021** Chemical Engineering Faculty Lecture Award, *University of Washington*
- 2021** Chemical Computing Group Excellence Student Award, *ACS COMP*
- 2021** Graduate and Postdoc Women's Fellowship, *D.E. Shaw Research*
- 2020** Rising Star in Chemical Engineering, *MIT*
- 2020** Husky 100, *University of Washington*
- 2020** ACES Graduate Student Symposium Top Speaker Award, *University of Washington*
- 2020** COMSEF Graduate Student Award, *AIChE*
- 2019** NSF-AGEP Research Exchange, *The California Alliance*
- 2018** Graduate Research Fellowship Program (GRFP), *NSF*
- 2018** National Research Traineeship (NRT), *NSF*
- 2016** ARCS Fellow, *University of Washington*
